

xtravu

DIGITAL SIGNAGE SOFTWARE

xtravu DSS is a cloud-based digital signage solution that helps small to large businesses create, manage, deploy presentations, images, videos or any other content for digital signage. Designed for any industry, xtravu DSS allows users to create custom schedules and quickly change presentations in playlists running on 1 to 1,000+ displays.

How it Works?

Integrate live feeds from Twitter, Instagram, Facebook or any third party dataset.

7:00
Morning

14:00
Afternoon

21:00
Night

Display dynamic content based on time or external triggers. For e.g. : Showcase different menu during Breakfast, Lunch & Dinner.

Divide screens into multiple parts

Seamless IOT Integration
